

## Specifications

Max. Media width	250mm
Cutting area	225mmx225mm
Laser power	150W
Laser spot size	270um
Laser cooling system	Water – Cooled
Max. working speed	25M /min
Max. roll dia.	300mm
Straightness	±0.1mm
Slitter	0
2nd rewinder	0
Optional item	Auto job changeover any-Link (Synchronize system for in-line printer)

## Cutting speed

Size	Shape	Layout	Design	Speed M/min (ea)	Label / 1hour	Label / day(8hours)
100 x 100mm	Square	2 across	□ □	20.3M (101)	6,060	48,480
100 x 100mm	Star	2 across	☆ ☆	22.2M (111)	6,660	53,280

# any-CUT II

On-demand laser die-cutting

## 15,000 labels can be cut within one hour without any retooling.

Without having to retool for cutting, 15,000 labels can be cut within one hour.

## Time and cost can be reduced by performance that serves a triple purpose.

It gives you one-stop solution for lamination, scrap paper removal, and slitting, so just wait and pass the time until your labels done.

## Production is possible without concerns about space.

any-CUT II does not require a large space. It can be installed in your office and cutting can be done whenever necessary.

## Concerns over consumable costs such as the replacement of knife edges are no longer necessary.

In the case of analog die-cutter using dies, the abrasion of knife edges requires frequent replacements. However, any-CUT II does not incur such consumable replacement costs.

## A customized modular designed solution

Your two step process of making labels will be become one step process by using any-Link with any-CUT II. Attach your own inkjet printer to any-CUT II and save your time and cost.

## Various cutting functions can be performed simultaneously.

Full cut, half cut, perforation and marking can be produced with a single label cutting operation.

## No expert is needed

No wasting time with setting up the media and machine. Set up the media within 5 minutes and spend more time with production of labels.

## User friendly designed machine.

any-CUT II is ergonomically designed to minimize movement during operation, with all tasks placed within the reach of the operator.

## Long labels can be cut automatically.

There is no limitation of a label length you can cut with the Split Cutting function.
